## ATTENTION

=====

This file will contain guide on how to install the mod and FAQ. Please refer to FAQ section before asking a question.

=====

## How to Install the Mod

=====

To install the mod, you'll need:

1. Luxor 2 PC (steam version not recommended (but might still usable))
2. QuickBMS (Download: <http://aluigi.altervista.org/papers/quickbms.zip> or just google it)
3. MumboJumbo script for QuickBMS (Download: <http://aluigi.altervista.org/bms/mumbojumbo.bms>)

How to install:

1. Extract the data.mjz file of your Luxor 2 using QuickBMS (guide: [https://youtu.be/Gi9jhZOi\\_5I](https://youtu.be/Gi9jhZOi_5I) )
2. In the newly extracted data folder, locate the "script" folder
3. Copy the "state" folder found inside the "script" folder to somewhere safe. "state" folder is not included in the mod
4. Remove the "assets", "data", "locale" folders and data.mjz from the game folder and replace them with the one from the mod pack (merging folder is very not recommended)
5. Paste the "state" folder to the "script" folder
6. Launch the game

Found bugs? The mod ain't working? You may contact me immediately at the server (so I can ask other members/staffs if I don't know how to solve it :p)

Enjoy the mod! :D

=====

## FAQ

=====

### **Q : Why some powerup name don't change?**

A : Check if you already replace the locale folder with the one from mod download pack. Also double check whether the english.mjz is still inside the locale folder

### **Q : Why the font doesn't change?**

A : Check if you already replace the locale folder with the one from mod download pack. Also double check whether the english.mjz is still inside the locale folder

### **Q : Why the game doesn't start after I install the mod?**

A : First, make sure you have followed the instructions given above. Make sure the state folder has been put where it should be.

If the game still failed to start, either this is version issues or there's an oversight in my part. Please report the problems to SphereMatchers discord serves. Members there might be able to help you. Alternatively you could try contacting me directly, but I'm not the most familiar with Luxor 2 issues so it's better to choose the former solution.

### **Q : I don't have Luxor 2 game, where can I buy it?**

A : There're several options where you can buy it, each with their own pros and cons

- Gamehouse

Link: <https://www.gamehouse.com/games/luxor-2>

Pros:

- Guaranteed 100% to work on any Windows PC/laptop
- Technically the most updated and stable version compared to others

Cons:

- Expensive compared to other options

- Big Fish Games

Link: <https://www.bigfishgames.com/us/en/games/1214/luxor2>

Pros:

- High chance to work on Windows PC/laptop (including Windows 11)
- Abundant amount of help and supports from SphereMatchers since there're lot of people who have this version

- Very cheap compared to other option. First game purchase on Big Fish Games has 70% discount

Cons:

- There're reports that the game failed to work even after various fixes and workarounds
- You're forced to download Big Fish Games' Game Manager before downloading the game
- You might accidentally subscribe to Big Fish Games monthly subscription if you're not careful

- Steam

Link: [https://store.steampowered.com/app/15920/Luxor\\_2/](https://store.steampowered.com/app/15920/Luxor_2/)

Pros:

- Most trustable store compared to other options
- Easier payment compared to other options

Cons:

- The least stable version compared to other options. Huge amount of reports that the game doesn't work on Windows 8 and above. Although there're several methods to fix it and there're extensive amount reports that the fix work, none is reported to work 100%
- As of September 2023, Luxor games never goes on sale anymore, thus the game price is pretty expensive
